- Get 3 bids for any work-
- Check contractor qualifications-

Negotiate with your insurance adjuster

Plan for additional living expenses or loss of use

Use FORTIFIED Standards

Learn how to work with FEMA

# Hurricane Prep

## *Before & After*

What you do now to prepare for a hurricane can determine what happens over the weeks and months ahead. When a major hurricane hits your area, plan to deal with repairs, rebuilding, insurance, and fraud.

**The days before a hurricane are vital** – use these resources from [IBHS](http://IBHS) and [Ready.gov](http://Ready.gov) to prepare, plan, and act to protect your family and home.  
*Be prepared to evacuate if needed.*

**Plan for after a hurricane** – [DontGoof.org](http://DontGoof.org) has resources to help you navigate repairing, rebuilding, insurance claims, building better with [FORTIFIED construction](http://FORTIFIEDconstruction), and FEMA disaster aid. Disasters are stressful, they feel personal, and then, you still have to deal with the outcomes. These resources can help.

Be ready to spot and [avoid contractor fraud](http://avoidcontractorfraud) and don't take shortcuts when rebuilding. Don't be a victim twice – Get three bids, all contracts in writing, and permits for any work! Check contractor licensing, insurance, and reputations. Be wary of large down payments.
